Clinic Services

- **Family Planning**

JCPH is there to help you plan your family's future with access to birth control, pregnancy testing, the emergency contraceptive pill, and much more.

- **HIV Counseling and Testing**

JCPH offers confidential HIV counseling and testing. You can choose to have a "rapid test" and receive results during your visit.

- **Sexually Transmitted Infection Clinic**

STIs can be painful or even life-threatening. If they are not treated, certain STIs can make you sick or unable to have children. If you think you are infected, make an appointment as soon as possible.

- **Cancer Screening**

Cervical cancers can be successfully treated if they are found in the early stages. Early detection saves lives.

- **Teen Health**

JCPH is a resource for teens looking for abstinence counseling, birth control and pregnancy testing. Tobacco prevention, education, youth advocacy, and immunizations are other services available for teens.

- **Immunizations/Vaccines**

Immunizations stop diseases that can cause serious illnesses and even death. It is much safer to get the vaccines than to get the diseases.

Locations
