1.0 INTRODUCTION

The purpose of this report is to list the crash frequency on unincorporated Jefferson County roads during 2005. The crashes reported in this study include fatality, injury, and property damage only (PDO) type crashes with damages in excess of $1,000. Crashes occurring on state highways, city roadways or private property are not included in this document.

2.0 DATA COLLECTION

2.1 Crash Data

The data contained in this report was summarized from accident records compiled from the Colorado State Patrol crash reports and the Colorado Department of Transportation (CDOT) database records. Each crash is summarized by road name, address, and if applicable, intersecting street. The total number of crashes for each specific address or intersection are reported (total crashes) along with the total fatality, total injury, and total property damage only (PDO).

3.0 CRASH LISTING

The crash data contained in Table 3.1 of this report is a comprehensive list of all reported crashes that occurred within unincorporated Jefferson County during 2005. The data is organized either by the main roadway or by the street name that was on the crash report. If the crash occurred at an intersection, then the "Intersecting Street" field is listed. The crash data is summarized in alphabetical order and by address range, and lists injury severity. All other information relating to the crashes contained in this report can be obtained through the Jefferson County Division of Highways and Transportation or the Colorado State Patrol.

Figure 3.1 displays the number of crashes by year including 2005 crash listings. During 2005, there were 5 (.04%) fatal crashes, 300 (28%) injury crashes and 751 (71%) PDO crashes totaling 1,056 crashes on all unincorporated Jefferson County roadways.

Figure 3.2 displays a map of Jefferson County with the address ranges to aid in determining crash locations.
