RE: REQUEST FOR WAIVER OF DRAINAGE REPORT FOR CONSTRUCTION OF A PROPOSED MODULAR OFFICE BUILDING AT FOOTHILLS LANDFILL, JEFFERSON COUNTY, CO

Dear Mr. McLean:

Golder Associates Inc. (Golder) has prepared this letter on behalf of Allied Waste Systems of Colorado, LLC (Allied) to request a waiver of the requirement to provide a Phase III Drainage Report associated with the construction of a proposed 56-ft-by-24-ft modular office building on the property of Foothills Landfill.

The proposed office building will be a modular construction, supported by piers resting on the existing ground and in the same location as an existing temporary building. As such, no excavation or change in the site grading will occur during the construction of the proposed building. There will also be no addition of impervious area resulting from the building construction, nor any changes to storm water flow patterns. As such, the overall site drainage will be unchanged from existing conditions. Furthermore, as an operational municipal solid waste landfill, site drainage issues are addressed in Appendix J – Surface Water Analysis of the Foothills Landfill Engineering Design and Operations Plan (EDOP). The office building site is also covered under the Colorado Permit for Stormwater Discharge Associated with Non-Extractive Industrial Activity (CDPS General Permit COR900000), for which a Stormwater Management Plan has been prepared to address site drainage, erosion control, and pollution prevention measures. Therefore, we request that the requirement of a Phase III drainage report be waived for the construction of the proposed modular office building at Foothills Landfill.

If you have any questions or require additional information, please do not hesitate to contact us at (303) 980-0540.
