JCPH Nurse Visitation Programs

Nurse Family Partnership / Partners for Healthy Families - prenatal and early childhood nurse home visitation program for first time mothers who meet financial guidelines.

Prenatal Plus Program - case management program to assure healthy birth outcomes by addressing the lifestyle, behavioral and non-medical aspects likely to effect a woman's pregnancy and overall well being.

For questions about any JCPH Programs, please call 303-232-6301

Public Health...Every day, Everywhere, Everyone

Public Health Nurses…work with families, schools, child care centers, physicians, advisory boards, health clinics and other community partners to improve health.

Public Health...Every day, Everywhere, Everyone

Connect with a Public Health Nurse

JCPH's Public Health Nurses work throughout our communities and in our clinics promoting and protecting the health of the county's diverse populations.

- Public Health Home Visitation Nurses
- Public Health Clinic Nurses
- Public Health Nurse Practitioners
- Public Health Case Management Nurses

Public health nurses work with other providers of care to plan, develop, and support systems and programs in the community to prevent health problems and provide access to care.

Resources are Available to:

- Pregnant women
- Postpartum (both mother and baby)
- Children with special health care needs
- Adolescents
- Anyone with concerns or questions or who might benefit from connecting with a public health nurse

Public Health Nurses

- Link people to community programs and services
- Educate individuals and groups of people about how they can be healthy
- Advocate for people who need assistance
- Assist individuals with special health care needs such as the elderly, disabled and children
- Provide preventive health screenings and services to reduce the rate of disease
- Participate in developing policies and quality assurance activities
- Respond to emergencies including infectious diseases and natural/man-made disasters
- Track occurring communicable disease and help people get treatment

Nurse Visits Provide

An opportunity to talk with a caring and compassionate public health nurse who can provide education and resources on many health issues including:

- Newborn care
- Growth and development
- Parenting skills
- Nurturing
