

FOUNDATION COMPLIANCE FORM

APPENDIX CHAPTER X

Do Not Alter This Form
(Please Print Legibly)

THIS FORM MUST BE FILLED OUT COMPLETELY

JEFFERSON COUNTY DIVISION OF BUILDING SAFETY
100 JEFFERSON COUNTY PARKWAY
GOLDEN, COLORADO 80419-3540
CONSTRUCTION SITE ADDRESS

BUILDING PERMIT NO:

CONTRACTOR'S NAME & ADDRESS

TYPE OF FOUNDATION: Drilled Piers Spread Footings Pad & Grade Beam
 Narrow Spread Footings Other (Please Specify)

FOUNDATION INSPECTION PROCEDURE

All inspections shall be performed according to the procedures outlined in this Appendix Chapter X, of the 2015 Jefferson County Code Supplement and shall be signed, dated, and stamped by a Colorado Registered Professional Engineer or Colorado Licensed Architect. (Drilled pier foundations shall bear the seal of a Colorado Registered Professional Engineer.) This appendix to the code provides a procedural guideline and is as comprehensive as possible, but cannot account for every possible situation encountered in the field. The guidelines shall be deemed to be the minimum inspection required and do not relieve the engineer or architect from any responsibility to conduct such additional inspections as may be necessary to determine that the foundation conforms to the plans and specification accepted for construction for the above referenced project. The inspecting engineer/ architect is required to consult the design engineer/architect on any unusual condition which may arise on the site. A set of foundation drawings bearing the Jefferson County Stamp shall be on the job site. Any modifications to accepted plans shall be approved by the design engineer and revised plans showing those modification submitted to the Division of Building Safety.

VERIFICATION OF INSPECTION

Our representative has inspected the applicable portion of the foundation and subsurface drainage system (where applicable) in accordance with the guidelines set forth in this Appendix Chapter X, of the 2015 Jefferson County Code Supplement. I do hereby verify that the portions inspected were in compliance with the plans and specifications on file with the Division of Building Safety. However, this verification is not a guarantee as to the overall performance of the foundation system. Drilling logs for drilled pier foundations SHALL be attached to the Foundation Compliance Form.

Section A may be used for all the required inspections.

Fill out Section B if more than one engineer has completed and is responsible for all the required inspections.

SECTION A

Type of Inspection		Dates of Inspections	Seal & Signature
1.	Site Condition / Preparation		
2.	Pier Holes & Piers / Caissons / Footings		
3.	Grade Beams / Foundation Walls / Slab on Grade
