# *Facts about ...* **McIntyre Outfall at Swamp Angel Detention Basin**

**March 3, 2010**

## **Project Overview:**

Urban Drainage Flood Control District (UDFCD) and Jefferson County contracted design services with Olsson Associates to develop the plans to increase the storage capacity of Swamp Angel Detention Pond and thus help alleviate drainage problems in the Fairmount area.

## **Where is Swamp Angel Pond?**

The Swamp Angel Pond is located southwest of McIntyre Street and 50th Avenue in the Coors Technology Center.

## **What is being constructed?**

A portion of McIntyre Street, between 50th Avenue and Table Mountain Parkway, will be raised and the western portion of the pond bottom will be excavated to increase the stormwater storage capacity from 26 acre-feet to 53 acre-feet. Storm sewer will be constructed in McIntyre Street between Table Mountain Parkway and Croke Canal to transport the runoff into the Clear Creek drainage system.

## **What has been done so far?**

Edge Contracting, Inc., of Golden, was awarded the construction contract and will start the excavating work in the pond the week of March 8. The project is expected to be completed in approximately five months.

Message boards are scheduled to be displayed to inform the traveling public.

*Please be aware that a detour will be provided along the west shoulder of McIntyre Street; however expect some delays in the work zone. Finding an alternate route to your destinations is suggested.*

## **Need more Information?**

Contact Wayne Schnick, project engineer, at the Jefferson County Transportation and Engineering Division at (303)271-8495, or [wschnick@jeffco.us](mailto:wschnick@jeffco.us) or go to the Transportation and Engineering Web site at <http://jeffco.us/highways/index.htm> for the most current update.

**Thank you for your patience during this project.**
