

## **Trail Construction Activity**

Jefferson County Open Space crews will begin trail construction activity at South Table Mountain Park as early as Monday, May 12, 2008. A 1.5-mile trail loop on the eastern portion of the mesa top will be upgraded to a durable, crushed granite surface that drains well and allows for wet weather use.

**BE ADVISED:** Starting Monday, May 19 gravel trucks will deliver crushed granite to the park and stockpile the material for use by Open Space crews. The **access road along Quaker Street** will experience a high level of traffic over a four-day period. Existing roads will be utilized to the greatest extent possible. Piles of the granite material will be located across the mesa top.

Weather permitting, this trail surfacing project is expected to be completed over a two and one-half month period (end of July). Additional trail maintenance and weed control activities will also take place while crews are on site.
