DO I NEED A GRADING PERMIT?

Staff Use Only

A Grading Permit is required A Grading Permit is not required P&Z Initials Date

See Page 2 for Performance Standards

Project Location/Name *(Street Address or Legal Description)* Subdivision

Section Township Range Project Acreage

Purpose of Grading

Owner's Name

Home Work

Owner's Address

Street City State ZIP

Part 1

Will the project involve?

A. Yes No Removal or placement of more than 300 cubic yards of material?

B. Yes No Disturbance of more than 10,000 square feet of area, including, but not limited to stripping of vegetation?

C. Yes No Grading of individual lots within a subdivision under the same ownership, and the total of all grading on all lots is more than 300 cubic yards or 10,000 square feet of area? See section 16.B.3.a.2 of the Jefferson County Zoning Resolution.

D. Yes No Working within sensitive areas which include: North and South Table Mountain, Green Mountain, the Hogback, existing slopes greater than 25%, cuts/fills exceeding 10 feet, geologic or floodplain overlay zones, disturbance of more than one acre?

Part 2

If you answered **NO** to *all* of the questions in Part 1, you **do not** need a Grading Permit. **However, you still need to comply with the Grading and Erosion Control Performance Standards listed on page 2 of this form.** If you answered **YES** to either A, B, or C, but **NO** to D, a Notice of Intent is required. If you answered **YES** to either A, B, or C, and **YES** to D, a full Grading Permit is required. If you answered **YES** to *any* of the questions in Part 1, please answer the following exemption questions:

A. Yes No Will the grading be done pursuant to, and in conformance with an approved lot-specific grading plan in conjunction with an approved, recorded process (plat, site development plan, exemption etc.)?

B. Yes No Is the purpose of the project to till agricultural land (no overlot grading)?

C. Yes No Is the purpose of the project to trench for the construction, maintenance, or installation of an underground pipeline, septic tank disposal field, electrical or communication facilities, or drilling or excavation for approved wells or post holes, and does not include overlot grading? Construction of access required to complete the trenching or for future maintenance is not exempt.

D. Yes No Is the grading or excavation in accordance with a mining permit, reclamation plan or sanitary landfill approved by Jefferson County?

E. Yes No Is the purpose of the project to maintain and/or clean a ditch, lake, pond, or water storage reservoir?

F. Yes No Is the purpose of the project to maintain or resurface an existing street/road, trail, sidewalk, parking lot/loading area or railroad bed (no overlot grading)?

If you answered **YES** to question A in Part 2, you **DO** need a Notice of Intent. If you answered **YES** to any of the remaining questions in Part 2, you **DO NOT** need a Grading Permit, but do need to comply with the Grading and Erosion Control Performance Standards listed on page 2 of this form.

Please sign this form and return to the Planning and Zoning

I hereby give permission for County staff to enter upon my property for purposes of site inspection and investigation. Please specify any extraordinary circumstances of which staff should be aware, i.e., dogs on the site, locked gates, etc.

Grading and Erosion Control Performance Standards

Even though a grading permit may not be required, any grading activity must comply with certain performance standards. Noncompliance with these standards may result in the issuance of a zoning violation. The grading and erosion control standards are summarized below. Please refer to Section 15 of the Jefferson County Zoning Resolution for the complete grading and erosion control regulations.

- ✓ No work may interfere with the flow of storm water (Zoning Resolution Section 16.E.1.a)
- ✓ Construction equipment must be kept out of watercourses (Zoning Resolution Section 16.E.1.b)
- ✓ Any drainage structures shall be designed and constructed in accordance with the Jefferson County Storm Drainage Design and Technical Criteria. If any culverts or other structures are proposed the designs need to be reviewed by Planning and Zoning. (Zoning Resolution Section 16.E.11)
- ✓ Excavations shall be constructed so that they are stable (Zoning Resolution Section 16.E.2)
- ✓ The slope of excavations shall not be steeper than 2 horizontal to 1 vertical (Zoning Resolution Section 16.E.3)
- ✓ The slope of fill surfaces shall not be steeper than 2 horizontal to 1 vertical (Zoning Resolution Section 16.E.7)
- ✓ Vegetation, topsoil and other unsuitable materials shall be removed from the ground surface prior to fill placement (Zoning Resolution Section 16.E.6)
- ✓ All topsoil shall be salvaged. When grading is complete topsoil shall be redistributed throughout the disturbed area. (Zoning Resolution Section 16.E.12.h)
- ✓ Except for roads and driveways, all grading activities shall be set back at least 7 feet from property boundaries and 25 feet from off-site occupied structures (Zoning Resolution Section 16.E.10)
- ✓ Temporary erosion and sediment controls such as silt fence, straw wattles, hay bales, and vehicle tracking control shall be installed prior to grading activities (Zoning Resolution Section 16.E.12.a)
- ✓ Upon completion of grading activities, all areas shall be stabilized with vegetation or other permanent erosion control measures (Zoning Resolution Section 16.E.12.b)
- ✓ Dust emissions (wind erosion) shall be controlled (Zoning Resolution Section 16.E.12.f)
- ✓ All erosion control devices shall be maintained so that they function as designed (Zoning Resolution Section 16.E.12.g)
- ✓ All concentrated storm water runoff shall be discharged to the nearest street, roadside ditch, storm sewer, or natural drainage way with adequate capacity. (Zoning Resolution Section 16.E.11.a)
- ✓ No increase in storm runoff volume or quantity and/or changes in points of concentration of stormwater runoff into an irrigation ditch is permitted in an irrigation ditch without permission from the Irrigation Ditch Company (Section 3.5.3 of the Jefferson County Storm Drainage Design and Technical Criteria)
- ✓ Earth material shall not be tracked onto public streets (Zoning Resolution Section 16.E.12.j)
- ✓ Should sediment leave the site for any reason, the sediment shall be cleaned up promptly (Zoning Resolution Section 16.E.12.k)
