**On-Site Restriction Form Letter “U”**

Date Prepared: January 9, 2006

**NOTICE:** This form is not to be altered and is to be completed prior to a rough framing inspection.

To Whom It May Concern:

A. I, \_\_\_\_\_, a Colorado Registered Professional Engineer or Colorado Licensed Architect have experience in foundation drainage design. Based upon my knowledge, sound engineering principles and industry practices, I state to Jefferson County to the best of my knowledge the following facts:

- 1. A subsurface groundwater collection system, including a main line underdrain with stub-outs to individual lots was required for this subdivision. The individual perimeter drain, with positive drainage away from the structure, is to be connected to this subsurface groundwater system.

A visual inspection of the connection of the perimeter drain and main collection line for Lot \_\_\_\_\_, Block \_\_\_\_\_, of the \_\_\_\_\_ subdivision, has been conducted under project number \_\_\_\_\_ by the firm of \_\_\_\_\_ on \_\_\_\_\_ (date).

- 2. The attached site plan depicts the approximate location of the perimeter drain connection to the main subsurface groundwater collection system, including depth and distance from property boundaries. This plan for the building to be constructed on the above referenced lot has been reviewed and/or prepared by me. I have verified that said plan satisfy or exceed the criteria set forth in paragraph A.1. above.
