Healthy People, Healthy Places

Clinic Services

- **Family Planning**

JCPH clinicians can help you decide which birth control method is right for you, provide pregnancy testing, the emergency contraceptive pill, and much more.

- **HIV Counseling and Testing**

JCPH offers confidential HIV counseling and testing. You can be tested and receive your results in 30 minutes.

- **Sexually Transmitted Infections**

Getting tested for STIs is a normal and routine part of health care for everyone, regardless of age, gender, relationship status, or sexual orientation. JCPH clinicians can help you learn your STI status when you get tested during your appointment.

- **Cancer Screening**

Cervical cancers can be successfully treated if they are found in the early stages. Early detection saves lives.

- **Teen Health**

JCPH is a resource for teens looking for abstinence counseling, birth control and pregnancy testing. Tobacco prevention, education, youth advocacy, and immunizations are other services available for teens.

- **Immunizations/Vaccines**

Vaccines are important for everyone at every age, to protect individuals, their families and vulnerable populations from illnesses. It is much safer to get the vaccines than to get the diseases.

Locations
