1.0 INTRODUCTION

The purpose of this report is to list the crash frequency on Jefferson County roads during 2001. The crashes reported in this study include fatality, injury, and property damage only (PDO) type crashes with damages in excess of \$1,000. No State Highways or City roadways are included in this document. The information in this report will be used to determine higher than average crash frequency locations on the County roadway network so additional safety analyses can be completed and roadway safety improvements can be recommended.

Due to limited funds available for roadway improvements, Jefferson County Highways and Transportation addresses the most needed safety improvements based on this analysis to improve traffic safety within the County.

2.0 DATA COLLECTION

2.1 Crash Data

The data contained in this report was summarized from accident records compiled from the Colorado State Patrol crash reports and the Colorado Department of Transportation (CDOT) database records. Each crash is summarized by road name, address, and if applicable, intersecting street. The total number of crashes for each specific address or intersection is summed (total crashes) along with the total fatality, total injury, and total property damage only (PDO) crashes that occurred at that location.

3.0 CRASH LISTING

The crash data contained in Table 3.1 of this report is a comprehensive list of all reported crashes that occurred within unincorporated Jefferson County during 2001. The data is organized either by the main roadway or by the street name that was on the crash report. If the crash occurred at an intersection, then the "Intersecting Street" field will be filled in. The crash data is summarized in alphabetical order and by address range. The only information summarized in this report is crash location, number of crashes and injury type. All other information relating to the crashes contained in this report can be obtained through the Jefferson County Department of Highways and Transportation or the Colorado State Patrol.

Figure 3.1 displays the number of crashes by severity with prior year's crash listings. During 2001, there were 8 (1%) fatal crashes, 361 (39%) injury crashes and 553 (60%) PDO crashes totaling 922 crashes on all unincorporated Jefferson County roadways.

Figure 3.2 displays a map of Jefferson County with the address ranges to aid in determining crash locations.

2001 Crash Summary

Name	Location	Intersecting Street	Fatal Crashes	Injury Crashes	PDO Crashes	Total Crashes
